

(Call for Papers)

ICITL 2018

2018 International Conference of Innovative Technologies and Learning

Conference Venue: [Hoteli Bernardin, Piran, Slovenia](#)

Conference Date: [Aug. 27-29, 2018](#)

Benefited from using a variety of emerging innovative technologies, e-learning environment has become highly diversified along the way. Diversified innovative technologies have fueled the creation of advanced learning environments by adopting appropriate pedagogies. Moreover, those technologies not only facilitate learning but also actively help students reach maximized learning performances. However, due to the rapid evolution of new technologies, how to make use of those technologies by complying with effective pedagogies to create adaptive or smart learning environments has been always on demand. Therefore, this conference intends to provide a platform for those researchers in education, computer science, and educational technology together to share experiences of effectively applying cutting-edge technologies to learning and to further spark brightening prospects. It is hoped that those findings of each work presented in the conference can enlighten relevant researchers or education practitioners to create more effective learning environments. ICITL is now ready to the public for submitting their works.
